Art Unit: 1616

Claims 1-98 and 133-168 are pending. Claims 1-49, 53, 56-60, 67-98, 133-135 and new claims 133-168 are withdrawn from consideration as directed to non-elected inventions.

Applicant is advised that this application does not comply with the sequence rules set forth in 37 CFR 1.821 et seq for the sequences disclosed in Table A on page 26. A sequence listing according to the rules in paper and computer readable form is required as well as a statement that the two are the same.

Claims 50-52, 54, 55, 61-66 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claim 50 "non-brittle" appears to be new matter. Applicants have not cited the location of its occurrence in the specification.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Art Unit: 1616

F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 50-52, 54-55, 61-66 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 90-101, 212-214 of copending Application No. 09/796170 in view of McKnight et al.

McKnight et al teach a collagen film comprising impregnated silver for treatment of burn wounds.

It would have been obvious to one of ordinary skill to add silver to the claimed composition of 09/796170 to achieve the beneficial effect of a treatment of burn wounds in view of McKnight et al.

This is a provisional obviousness-type double patenting rejection.

No claims allowed.
